

## **Fetal Pig Dissection Marking Criteria**

### **Quality of Dissection and Group Participation (10 marks)**

- Dissection directions are followed carefully and reasonably within the correct order.
- Organs and organ systems are carefully laid out and dissected finely and precisely
- Gross dissection (large or long cuts) are taken with care, resulting in clean edges with minimal tearing
- Dissection tools are used appropriately and safely
- All group members are present each day and working together in a professional manner

### **Image Collection (3 marks each; there should be 15 of them according to the task list)**

- Prepare an image collection of the dissection. Each image must have the following components:
  - It must be in focus and labelled as much as the image allows and to the degree of detail we achieve in class. [1]
  - Each image must have a figure legend including the name of the part, and observations that are not portrayed in the image. (ie. texture, position in animal, consistency) [1]
  - It must take up at least  $\frac{1}{4}$  of a 8.5x11 page.[1/2]
  - Each image must have a reference number (ie. Figure # 3) [1/2]

### **Dissection Questions (17 marks)**

- Prepare detailed answers to the 12 questions regarding the dissection found attached.
